

LIPPERT TILE COMPANY, INC.

## Reclamation Basics

The Lippert Carpet Recycling program accepts all types of carpeting (and padding). We guarantee 100% of these materials will be diverted from landfills via recycling and waste-to-energy programs.

Participation is easy. There are four ways you can take advantage of our program:

1. Drop off your old carpet at our facility.
2. Arrange for us to pick up your old carpet
3. Hire our experienced team to remove the old carpet for you.
4. Hire us for the floor covering work on your project; the reclamation is included when we do the work!

Interested in participating? Following is a list of what you would need to do:

- ♻️ Carpet must be dry.
- ♻️ Carpet must be clean.
- ♻️ Carpet must be free of debris (no trash, demolition debris, asbestos contamination, garbage, base or tac strips).
- ♻️ Pieces must be kept in manageable sizes – no bigger than about 10' x 10'.
- ♻️ You will need to provide the quantity and type of material to be recycled.

Your participation in our program may help earn your project valuable LEED credits. We can provide a certificate of your participation upon your request.

Best of all, you have the knowledge that you are doing the right thing in helping sustain our world for the next generations to come.

For more information, contact our office at (262) 437-9300 or see our website.
